Seoul, South Korea

Applied AI engineer with experience in real-time perception, autonomous systems, and production 3D vision deployment.

Experience

Deep Learning Engineer — Imagoworks, Seoul, South Korea Aug 2020 – Oct 2023

- Led development of **3D scan registration systems** deployed in clinical AI workflows
- Developed 3D deep learning models for browser-based and edge AI inference using WebAssembly and ONNX
- Built data pipelines for large-scale **3D scan processing**, alignment, and model evaluation

Machine Learning Engineer Intern — Navier Boat, San Mateo, CA Mar 2020 – Aug 2020

- Developed **real-time perception systems** for autonomous surface vehicles in real-world maritime environments
- Built **multi-sensor perception pipelines** integrating vision, radar, and Kalman filter-based tracking
- Supported deployment of **real-time autonomous systems** using CUDA, ROS, and AWS-based data pipelines

Deep Learning Researcher — PCCL, Brigham Young University Feb 2019 – Apr 2020

- Developed **AI-based medical imaging systems** through international research collaborations
-

Publications

- *Automated Detection of Dental Crown Finish Line, Journal of Prosthetic Dentistry, 2024*
 - *GAN-based Dental Design Optimization, Journal of Dentistry, 2023*
-

Selected Patents

- **3D Medical Image Registration — PCT/KR2024/095421**
 - **Automated 3D Scan Alignment — PCT/KR2024/011839**
 - **3D Prosthesis Generation — PCT/KR2024/005369**
-

Education

Korea University — M.S. in Computer Science, GPA: 4.33/4.5 Jun 2024
Advisor: JungHyun Han, Ph.D.

Brigham Young University — B.S. in Applied & Computational Mathematics, GPA: 3.59/4.0 Apr 2020

Honors & Awards

- Don Robinson Scholarship, Brigham Young University
-

Leadership & Service

Full-Time Missionary — The Church of Jesus Christ of Latter-day Saints
Busan Korean Mission | 2022–2024

Technical Stack

Python, C/C++, PyTorch, OpenCV, ROS, CUDA, ONNX, Docker, AWS, WebAssembly, JavaScript/React
